# 1954 PRICE LIST

## GREETINGS TO OUR CUSTOMERS AND FRIENDS:

For the year of 1954 we are offering our list of Dahlia Roots and Plants, Chrysanthemum Plants and a few Perennials.

Our dahlia selections are from new Introductions of 1954, on down to the older and standard varieties that have made a good record in the showroom as well as in the garden.

The year of 1953 season for dahlias was very bad due to too much rain at planting time, and a terrific heat and lack of rainfall during the growing season. Frost came October 6, which was about two to three weeks earlier than average. This kind of a season always cuts the production of Dahlia Roots for all growers.

A number of varieties were a complete loss which makes our list much shorter than in the past years.

For this reason we have had to raise our prices on some varieties and do not have the root crop to offer at reduced rates as in the past.

## Dahlia Plants

We will have a large selection of Dahlia plants for 1954. More people are using Dahlia plants than ever before.

Their cost is one-half of the root price, and they will bloom and produce the same as roots. They do not have to be planted as early as roots are planted. Properly grown plants produce flowers as early as from roots. Dahlia plants are ready for shipment from April 20th till June 30th.

Our best crop of dahlia roots last fall were from dahlia plants. Anyone can grow dahlia plants with care. After you have used plants you will like them.

## Rooted Cuttings

Last year we sold a number of rooted cuttings, although we did not list them in our catalog. However, we are listing them this year due to past requests and demand. We have made some special attractive prices in Rooted Cuttings. The Cuttings are much more less expensive than roots or plants. The abbreviations "R.C." in the catalog mean "Rooted Cuttings."

Rooted Cuttings should be potted as soon as received and watered thoroughly. Protect from direct sunlight for 4 or 5 days and keep from wind and drafts. The Rooted Cuttings will soon establish themselves and become a strong plant with a small investment. Rooted Cuttings can be ordered earlier than plants. A big saving is earned when you purchase Rooted Cuttings and you also have the newer varieties with a minimum investment. Early ordering is advised on the Rooted Cuttings, as the shortage on Roots this year will soon exhaust the supply we have in both Roots, Plants and Rooted Cuttings.

## Shipping Information

Orders are booked and filled in order received. Early ordering is advised while stock is complete.

All stock **STATE** inspected and sent to you in a growing condition. We guarantee all stock true to name. Anything proving otherwise will be replaced the following season.

## Free

On an order of \$5.00 or more from the above perennial offers we will send you 5 mixed dahlias without charge.

## Future Catalog Request

If we do not have on file an order from you in the last three years you are automatically dropped from our mailing list. However we are glad to mail you our list if you will only request same. This is done to save catalogs as many changes are made in a period of three years and you may not be interested in them any longer.

Therefore we use this method to keep our files up to date with interested flower growers. Thanks.

This list cancels all former price lists and orders will be filled only from this list. So do not order from other lists.
